Instructions for Using Blue Pelican's <u>ExamView Pack</u>

<u>ExamView Pack</u> download:

Download the <u>ExamView Pack</u> in zip form:

http://www.bluepelicanjava.com/ExamViewZipFiles/ExamViewDownload.ZIP

Download a self extracting version of the <u>ExamView Pack</u>:

http://www.bluepelicanjava.com/ExamViewZipFiles/ExamViewDownload.exe

Download a pdf file that is a **printable** version of everything in ExamViewPack. This is especially convenient for a teacher to have when a student asks a question about some quiz they are taking online.

http://www.bluepelicanjava.com/ExamViewZipFiles/ExamViewPack.pdf

Steps to enable students to take online (LAN) quizzes and exercises:

- Purchase ExamView from www.fscreations.com and install on your computer. The regular version is $139 and they also have a trial version....(**Blue Pelican Book Company does not sell nor do we support ExamView**: we simply recommend it and provide ready-made quizzes, exercises, etc. for it.)

- Install a copy of ExamView's *evplay.exe* file on each student's computer.

- Download and unzip the <u>ExamView Pack</u> from Blue Pelican (easiest with the self extracting version) and store on your computer.

- Copy the *.eot* files (in <u>ExamView Pack</u>'s *LANtests* folder) to a shared folder on a server in your network. This folder must have "write" permissions.

- On the computer in your room where you install ExamView, use ExamView's Test Manager to enter the students in your class and make assignments (the quizzes, exercises, etc.) To limit student access to assignments, set times and/or passwords.

- The students launch the *evplay.exe* file on their computer and then navigate to the share on the server where they will be able to see their assignments.
